Valuation & dividend distribution
BMIT Technologies plc

Valuation approach

- Valuation is based primarily on the [Income Approach](#), whereby projected cash flows from the Group's operations are discounted to their present value equivalent using a rate of return that reflects the relative risk of the investment
- The financial projections for the period up to 2024 (representing the stabilised year) and an estimate of the Terminal Value were discounted to present value using an assessment of the Group's cost of capital
- The [Market Approach](#) was applied primarily to benchmark the valuation multiples implied in the valuation to observed valuation multiples for comparable publicly traded companies (e.g. EV/EBITDA multiples)
- Valuation assessed as at 31 July 2018 based on latest available consolidated management accounts

Valuation (carried out by PwC)

- Enterprise Value of the Group based on the Income Approach is estimated at c. €100m
- Implied EV/ EBITDA multiple between 9x and 11x
- Listed peer companies trading at an average EV/ EBTIDA multiple of 20x
- BMIT Group's equity value is estimated at c. €100m
- P/E ratio in the region of 20x
